

Ventless Hood

Model PO-VH

- The compact and simple design of the ventless hood eliminates the need for expensive roof modifications and the hassle of dealing with multiple vendors supplying separate hood and electrical systems.
- Our one-of-a-kind stainless steel hood attaches directly on top of certain model electric ovens.

Standard Features

Ventless Hood System

The Ventless Hood consists of an Air Filtration System. The Air Filtration System operates in three steps:

- (1) Baffle Filter traps large grease particles;
- (2) Electronic Air Cleaner consists of an ionizer which charges particles of dirty air allowing them to be collected by an electrostatic force;
- (3) Charcoal Filter further entraps any particles which may have escaped the Electronic Air Cleaner, and the charcoal filter helps eliminate odors.
